

Port digitalization & Modernization:
Fueling our way to become an Asian maritime hub

Atty. Brenda Pimentel

Digitization and Digitalization
key to making a maritime hub

- Philippines as a maritime hub - a dream of yesteryears

- We must (at least) be as good as our competitors

Where lies the challenge

- Ambivalent perspective (inactive, uncertain)
  - no persistence in pursuing the vision
  - lack expression of support from stakeholders
- Insurmountable obstacles??

People watch what you do more than what you say

- Are we ready to hurdle the obstacles to digitization and digitalization?

Would digitalization been able to avert the Oil spill in Mindoro Oriental??

Question that has not been asked thus far, and hopefully will be dealt with (may be) after the response, clean-up and damage assessment are completed

THANK YOU
