Leveraging Technology, Becoming a First-World Economy

Presented by:

Catherine Jalandoni
Country Director
Global AI Council Philippines

Understanding First-World Economy

Strong Economic Stability

Advanced Infrastructure

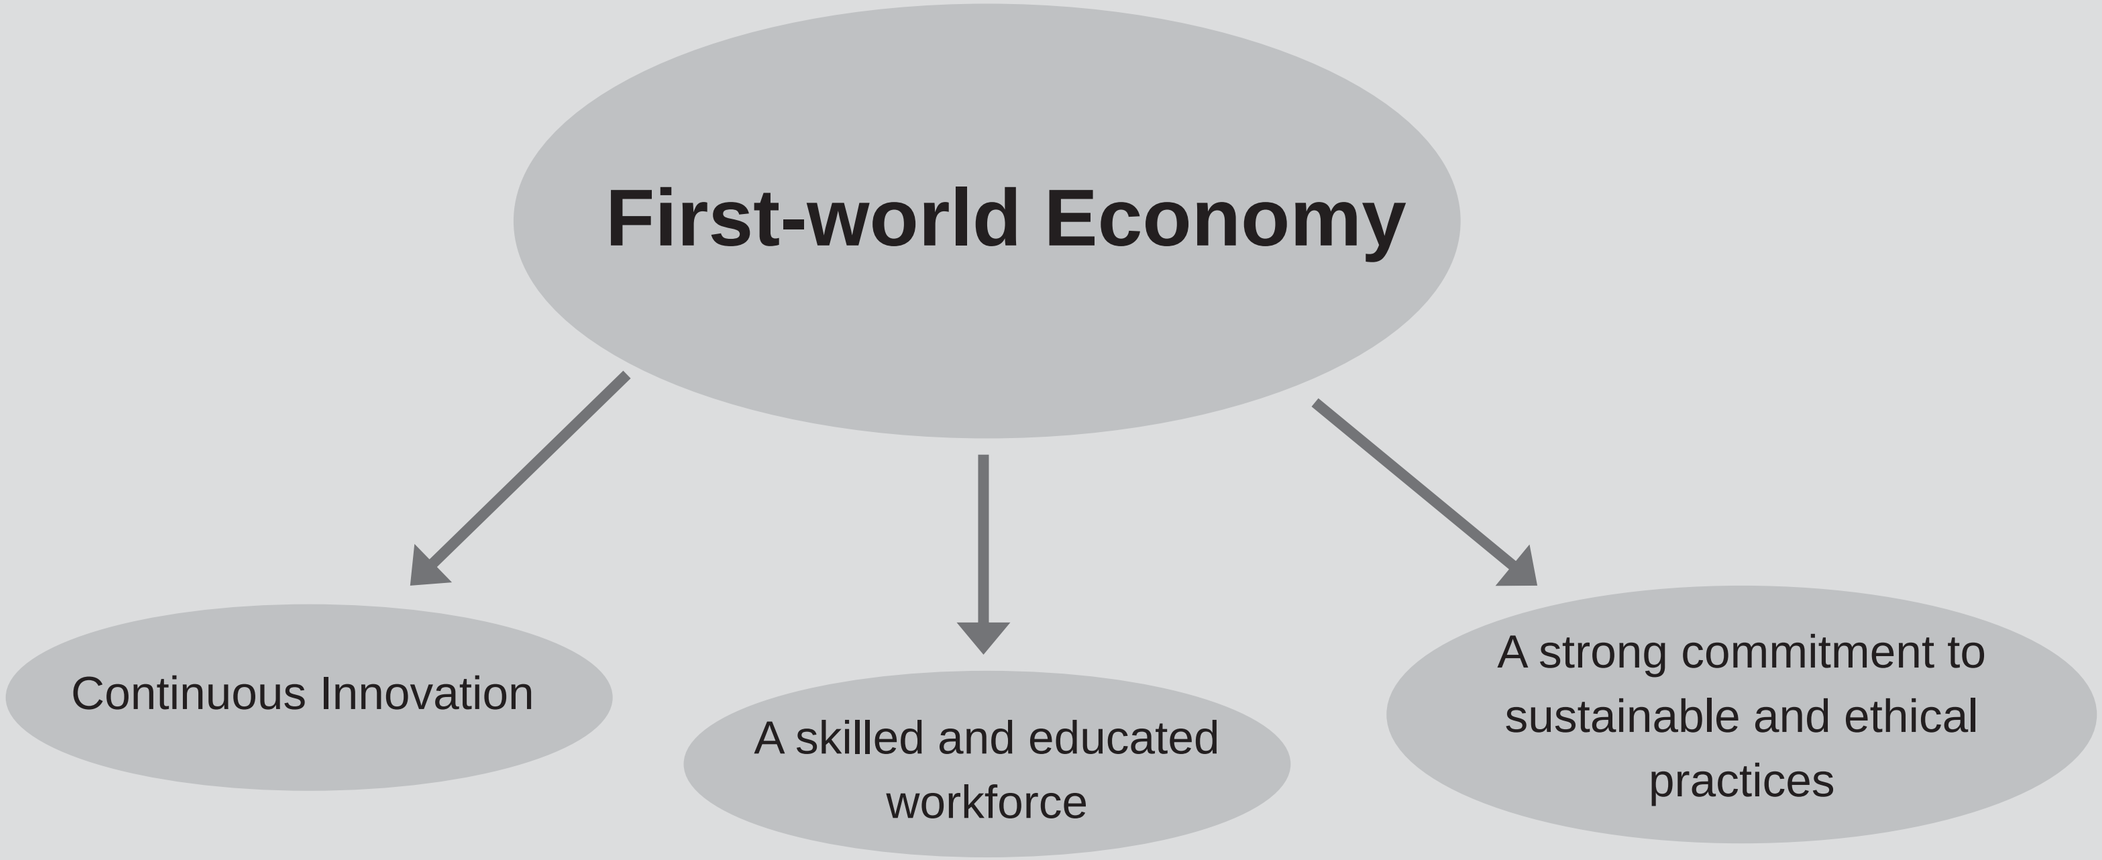

Seamless integration of technology across industries and everyday life

Embodies a high standard of living and quality of life for all citizens

Understanding First-World Economy

Where does technology fit into this picture?

Technology is the engine driving progress.

Key Technology Trends

Artificial Intelligence and Automation

Reshapes industries by optimizing processes and reducing human error.

Green Tech Solutions

Revolutionize how we produce and consume energy, pushing us toward a more sustainable future.

Data-driven Decision-Making

A cornerstone for informed strategies in both the private and public sectors, enabling smarter, more impactful decisions.

Impact of A.I. in the Philippines

Impact on low-skilled work and highly skilled work

A.I. has evolved from being simple robotics to systems that can ‘*think*’ and ‘*make*’ decisions autonomously.

STATE OF THE NATION IN A.I. (SONAI)

January 22, 2025 | GSIS Theater

FLAGSHIP BY GLOBAL AI PH

The annual congress will invite AI stakeholders to discuss and present who they are and their initiatives, furthering the education and adoption of AI in the country.

COMPILED REPORT

The conclusion of the congress will be published as a compiled report which can be used as basis for developing strategies. This report will be given to all participating organizations, public and private.

AI DIRECTORY

The congress and resulting annual report will ultimately apply for directory as part of the organization’s sustainability strategy.

Emerging Technologies for First-World Progress

01 A.I. as a key driver of transformation

02 Strive for leadership in emerging technologies

03 Prioritize Tech4Good and uphold Ethical AI for good

Leveraging Technology comes with responsibilities

Tech Governance becomes crucial

Tech Governance

- Ensures innovation is guided by strong policies and frameworks.
- Aligns technology use with organizational goals and public trust.

DATA PRIVACY

Beyond compliance, privacy is an opportunity to build trust with customers by ensuring transparency and security in every interaction.

CYBERSECURITY GOVERNANCE

Cybersecurity governance ensures organizations can anticipate risks, protect sensitive data, and remain resilient in an ever-evolving threat landscape.

- Tech governance encompasses the frameworks and policies that guide the responsible use and development of technology

- It ensures that the technology we embrace serves us well, protects privacy, prevents misuse, and promotes fairness.

Digital Transformation

- Embracing technology at scale demands a strategic approach that aligns with organizational goals.
- Governance ensures innovation minimizes disruptions and maximizes value.

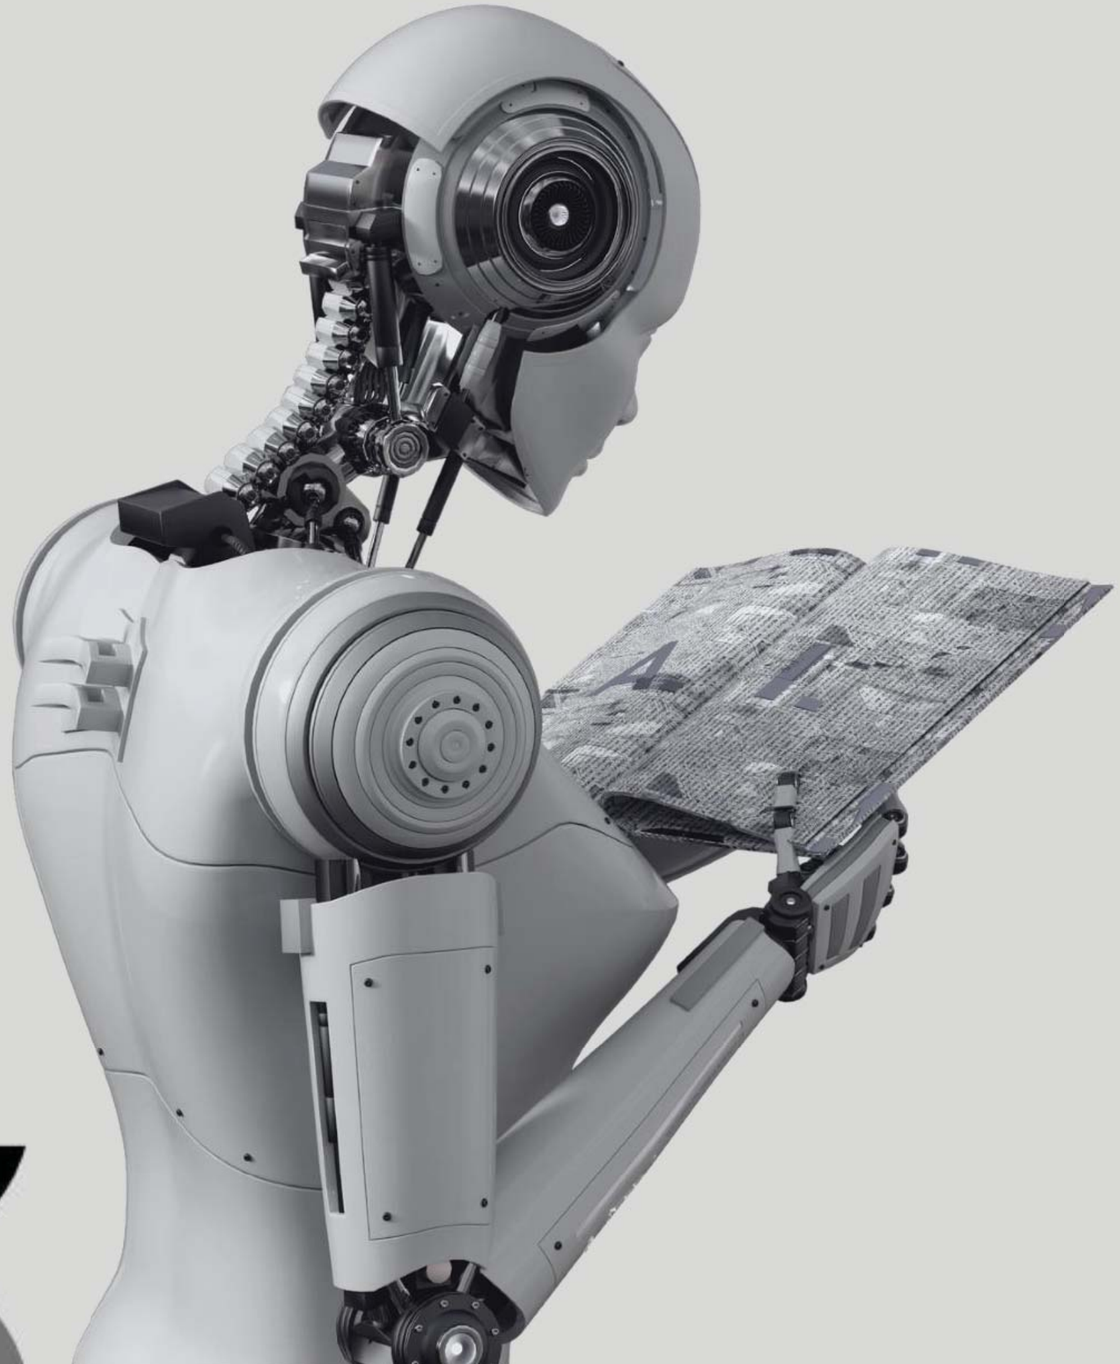

Strategic ***IT governance*** plays a critical role in aligning IT investments with business objectives

Sustaining First-World Status Through Governance

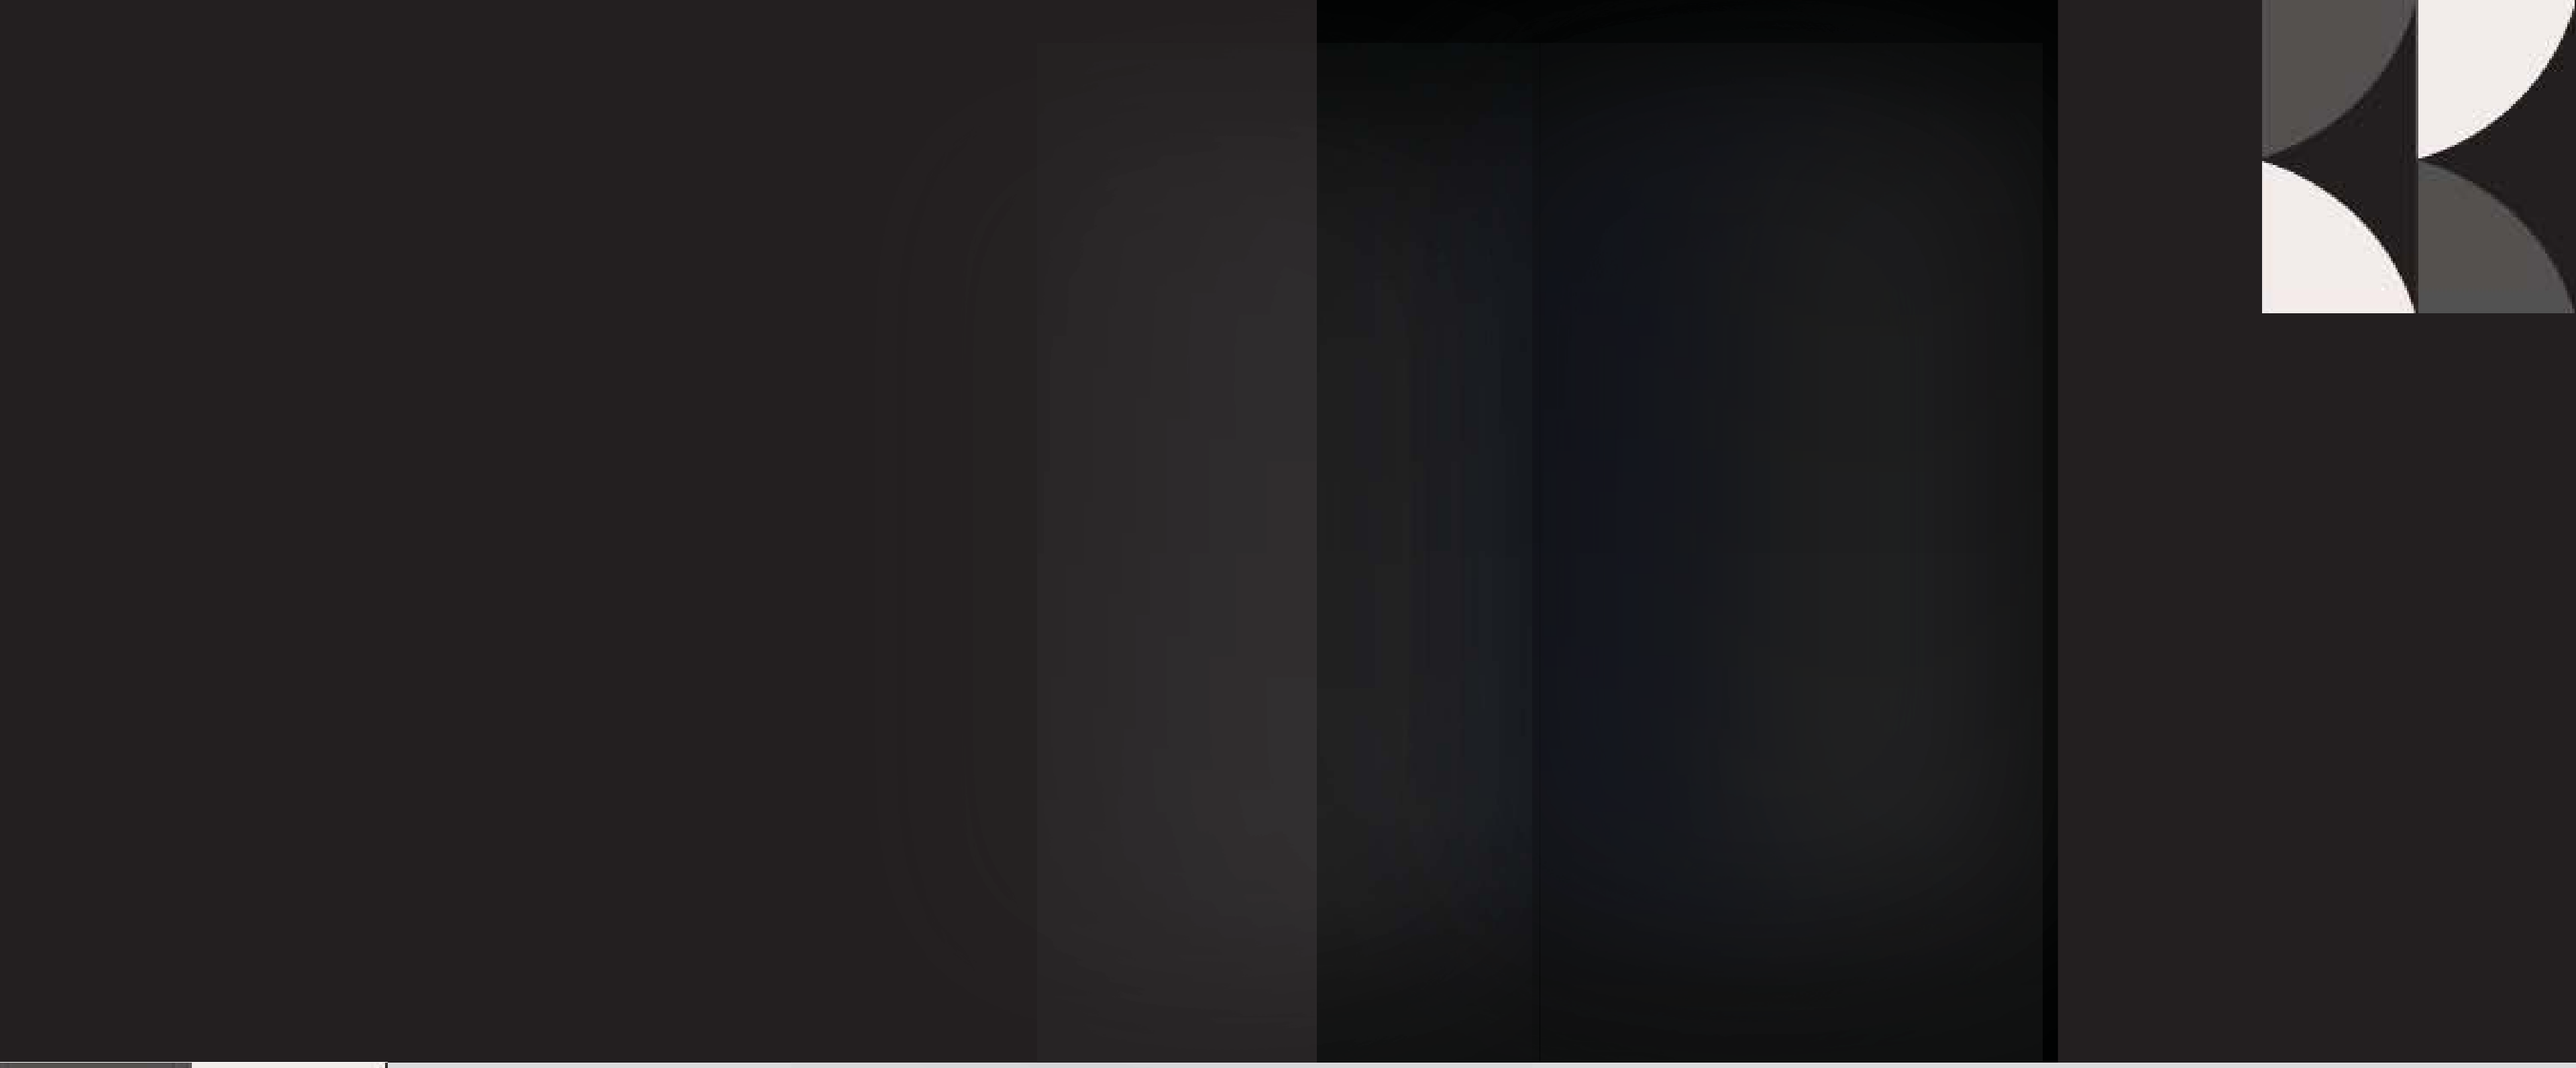

Being truly first-world requires an unwavering focus on ethics and corporate governance

Prioritizing transparency in how technology is used and implemented creates a culture of trust and inclusivity

"Technology is a powerful tool, but its true value lies in the governance and ethics that guide its use."

Thank you!
